Please note the below address should be put in as the server url.

http://mail.services.live.com/DeltaSync_v2.0.0/sync.aspx

I have tried the pop3 configurations, but they did not work; so I deleted my hotmail account and selected hotmail or the http stuff. And now this is my configuration for me and it works. If you have questions let me know I'll try to help. I am using windows live mail.

Please note to double check your ISP's email port settings that might be a factor.
